

The Hobbits Home Learning Grid

English

Last term we had started to read Street Child. Which is all about a little boy living during the Victorian Era.

Using your knowledge about this time, create a story about a Victorian child.

Your character could be living on the streets like Dodger from Oliver Twist or she could be in a workhouse or you could do something completely different and write about a child who was wealthy during this time. What adventure would you take your character on?

You could do this as a comic strip or graphic novel with images - be creative with your story!

Maths

This year, we have done a lot of work on multiplying and dividing by 10, 100 and 1000. You can practise this on BBC bitesize or you can pick your own numbers at random and multiply or divide them and write down your answers.

Remember, if you multiply, the place value will move to the left but if you divide, the place value will move to the right.

<https://www.bbc.co.uk/bitesize/articles/z7r492p>

Science

Our next Science topic was materials. As part of the topic you can investigate which materials will dissolve in water. This means that they will mix with the water and cannot be seen. Materials that you could test are: sugar, salt, flour, rice, gravy granules, coffee granules etc.

Remember to observe and either discuss or record your observations.

Over the next few weeks, we would like you to complete as many of these challenges as possible.

We would love to see what you have been doing, so please ask your adult to take a picture of your work and send it to us on Twitter or Facebook. We will be sharing your home learning in an assembly when we get back into school.

Remember, you can contact your teacher on Purple Mash 2Email with any questions.

Stay Safe 😊

PE

It is important to keep active while you are not at school. One exercise you can practise in your home is standing long jump, as demonstrated below. Measure how far you can jump and see if you can beat your best distance.

Music

As music is good for the soul. Try and listen to the radio once a day to hear some different types of songs and then make a list of the instruments you hear being played.

I would also like you to create your own musical instrument, you can make this using cardboard, elastic bands, string, clingfilm - all sorts of different things you may have in your house.

History/DT

This month marks a very significant time in European History. On Friday 8th May, Britain will be celebrating VE day. This marks the day the second world war ended in Europe. People celebrated by holding Street Parties. I would like you to plan a street party. Think about the food, games, decorations and invites. I would like to create a party pack and maybe you could host this party in your own home/garden.

As part of this I would like you to choose a recipe and make a savoury dish with your adult at home, you could even have a WW2 theme to your meal!

Geography

We have looked in great depth at the effect of Climate Change in class this year. I would like to create a campaign to encourage people to take care of their local area. It could be a campaign to stop littering or fly tipping. Or it could be a campaign for more people to grow flowers in their gardens or in a hanging basket to encourage more wildlife into the area.

Art, Craft and Design/PSHCE

As you know, there are lots of people still working very hard to keep the country going. These people are called Key Workers. I would like you to design a flag that you could fly at your house to support and celebrate these people. You could use an old piece of material and some felt tips or paint to create your flag. This should support ALL key workers and be inclusive of all people who are working in very tough conditions. You can find a list of key workers online.

RE

During this month, Muslims are taking part in Ramadan. I would like you to create a factfile about this celebration and why it takes place.
